Operation and Maintenance
Benchmarking Network

www.bsria.co.uk

Benchmarking allows you to
identify areas where you can

Reduce cost

Improve efficiency

Improve service

Save energy

The philosophy of benchmarking is one of continuously and objectively seeking improvement.

BSRIA's O&M benchmarking Network provides a tangible source of information to help building operators to evaluate their performance against their peers

Data collection focuses on four main areas:

- Maintenance performance
- Maintenance costs
- Energy
- Soft services

Respondents are categorised by the type of building they operate. They are also further broken down into size of building and geographical location. This allows members to make better like for like comparisons

The BSRIA Operations and Maintenance Network includes major service providers and facilities managers from a wide spectrum, including healthcare, local authorities, education, financial institutions, manufacturing and leisure.

Network members keep up to date with the latest industry practice through our seminars, which are held four times per year. The seminars are FREE to members and also open to non-members for a fee.

Member's comments

"Subjects well presented and relevant"

"Thought provoking"

"A very informative day"

Forthcoming events

Friday July 3rd 2009	FM Legislation: are you in the know? Halving waste to landfill Workplace recycling F Gas 2009 update Compliance Pandemic planning Health & Safety strategy 2010 & beyond
Venue: The Commonwealth Club, London
